Dear Nissan Motorsports Customer,

As you look through the new Nissan Motorsports Competition Parts catalog you will notice it has many new products and features. It still includes a wealth of products for "heritage" Nissan and Datsun models as well as products for the newest models like the Nissan GT-R, 370Z and Infiniti G37.

Some new faces have joined the existing experienced staff at Nissan Motorsports Competition Parts combining the irreplaceable knowledge that comes with working in this business for many years with a fresh, new perspective.

Our driving force though, is always the same. It's our passion for winning, being leaders not followers through bold thinking and execution.

The current line of well-designed, high-performance Nissan and Infiniti vehicles were influenced by years of racing – and winning – in a variety of ultra-competitive motorsports series. We remain committed to continuing to build our motorsports competition parts heritage because we know at the end of the day it will result in better products for you.

For your convenience, the latest version of this catalog will always be available for download from the "consumer" section of the nissan4parts.com website. You will also find the current Nissan Motorsports Racer Support and Contingency Awards Program information and forms there.

See you at the races!

HOW TO USE THIS CATALOG

This catalog contains hundreds of parts for Nissan vehicles and engines. It is easy to find the performance part you need: Simply check the division tabs on the outer edge of the pages for the proper component. When in doubt about a particular Nissan Model, cross-reference your model or engine in the model guide in the front of the catalog. The guide includes a section on reading the 17 digit VIN numbers to help in locating the models. This will help identify the engine, transmission, differential and year of each model of vehicle.

TECHNICAL ASSISTANCE

This is not a how-to book. When purchasing Motorsports parts, we have to assume that you possess the knowledge and necessary tools to install them. If you do not possess these skills, it will be to your advantage to retain a professional technician to do a portion or all of the work required. We can provide the parts to make your Nissan faster, but we cannot make you a better mechanic. For additional information concerning applications or availability of parts listed in this publication, write or call:

PRICES

Nissan Motorsports is in the process of keeping a price list on the Dealer Portal. Retail prices are set by the individual selling dealers carrying the Nissan Motorsports Performance parts line. Nissan North America reserves the right to change published prices and specifications without prior notice. Invoices are established at prices in effect at the time of ordering.

PARTS WARRANTY

Nissan Motorsports parts are sold "as is" without any warranty whatsoever. Implied warranties of merchantability or fitness for a particular purpose, are excluded. The entire risk of quality and performance for such parts is with the buyer. Should such parts prove defective following their purchase, the buyer and not the manufacturer, distributor, or retailer, assumes the entire cost of all necessary services or repairs.

The Nissan vehicle and parts warranties are voided if the vehicle or part is used for competition or if they fail as a result of the modification.

It is the competitor's responsibility to inspect and verify the dimensions and specifications of all Nissan Motorsports parts prior to installation.

Inventory of certain items in the Nissan Motorsports Parts Catalog is limited and may not be available for immediate shipment.

SERVICE MANUALS

The purpose of this catalog is to provide a comprehensive listing of Motorsports and OE parts that will assist you in increasing the performance of your Nissan vehicle. As previously stated, this is not a "how-to" book; that is the function of the Nissan factory service manual. It is highly recommended that a genuine Nissan service manual be purchased prior to performing any work on your Nissan vehicle. These manuals can be purchased directly from:
