TIRE CHANGER CAUTION

APPLIED MODEL: 1990 300ZX

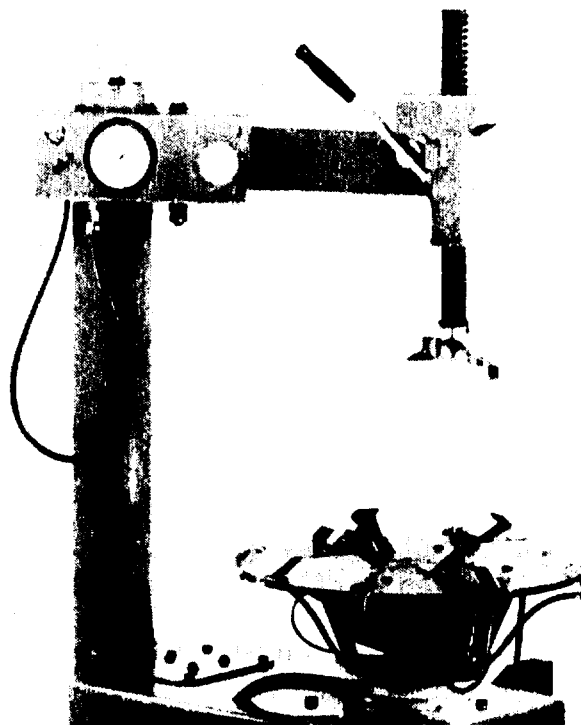

SERVICE INFORMATION:

Use a "European" style, rim clamp tire changer to remove and replace the tires on 1990 300ZX alloy wheels. This type of changer will not deface or otherwise damage the wheels.

Do not use the standard "center-post" type of tire changer. The hold-down cone may not fit into the wheel center, which means the cone will tighten on the exterior surface of the rim and cause damage.
